HOUSING AFFORDABILITY INDEX

Housing Affordability Index (HAI) has a base of 100, representing an area where the median income is sufficient to qualify for a loan on a home valued at the median home price and not be cost-burdened. Values > 100 indicate increasing affordability.

Notes:

- HAI is not applicable in primarily rental areas.
- HAI is not reported for areas containing 50 or fewer owner-occupied households.

PERCENT OF INCOME FOR MORTGAGE

Esri's **Percent of Income for Mortgage**(POIFM) is similar to Esri's Housing Affordability Index except it measures affordability from a monthly budget perspective. POIFM measures the percentage of median household income in an area dedicated to mortgage payments on a median valued home in the area.

Note: POIFM is not applicable in areas with no households or in predominantly rental markets, and does not include home insurance, private mortgage insurance, or property taxes. Esri's home value estimates include owner-occupied homes only.

PERCENT OF INCOME FOR MORTGAGE INDEX

Percent of Income for Mortgage Index has a base of 100. Values higher than 100 identify that a larger share of median income is required to cover a mortgage payment relative to the nation. Values below 100 identify areas where a lower share of median income is required.

Note: POIFM is not applicable in areas with no households or in predominantly rental markets, and does not include home insurance, private mortgage insurance, or property taxes. Esri's home value estimates include owner-occupied homes only.
